MPG5 Miniature Parallel Gripper

The MPG5 gripper is designed for pick & place of small pieces. The cutting edge design of the MPG5 allow for manifold mounting a series of MPG5's in line without the concerns of space for fittings or airlines. Another unique feature of the MPG5 is the dual-purpose purge port that is part of every gripper. This feature facilitates use of the MPG5 in some clean room applications and very dirty environments.

- A. Shielded design for long service life.
High grip force to weight ratio.
- B. Top porting allows units to be manifold mounted eliminating air fittings. Side and Top porting standard.
- C. Purge port will evacuate any contaminates from inside for a clean room environment. When pressurized the purge will keep debris from entering unit in dirty environments.
- D. Jaws are aluminum bronze alloy and T-Slot style to prevent jaw breakage.
